

Slides

You can use a tee to set up your ball before your 1st shot.

You have to be at the first tee before your tee time.

1/3 planes found

The Physics

Paragraph explaining physics about how club face angle and shaft length affect ball flight & swing. Include a graph, all black and white.

Pictures of club fitter altering and comparing face angles and club shaft lengths.

TeaTee was created by Sophia Joeng to help golfers of all levels to connect with the online golf community. I want to allow all golfers to understand complex concepts & terminology that can otherwise require coaching or extensive resources to learn.

The Math

Paragraph explaining math about how the circumference (and not the surface area) of your expected shot and the positioning of the hazards are used to calculate whether your shot choice has the best probability outcome. Include math equations.

Pictures of professional players using Trackman training strokes gained on projector and indoor simulator.

TeaTee was created by Sophia Joeng to help golfers of all levels to connect with the online golf community. I want to allow all golfers to understand complex concepts & terminology that can otherwise require coaching or extensive resources to learn.

The Mechanics

Paragraph explaining the difference between 1 plane swing & 2 plane swing and how staying on plane creates the most kinetically & energy efficient swing. Include a graph, all black and white.

Pictures of professional players using different tools to help their swing stay on plane, such as foam ball. (John Rahm uses 1 plane swing, contrast him to an obvious 2 plane swing player)
